Recommendations — Expansion & Sales

Expansion: Focus on high-performing state/make/model combos (Ford F-150 in FL, PA, TX; Nissan Altima in CA). Ensure top sellers' stock availability in key states. Reassess underperforming states.

Sales Performance: Increase dealership activity during high-demand Q1. Improve Q3 and Q4 sales with promotions, financing offers, and trade-in incentives.

Bright Motors

Recommendations — Inventory & Profitability

Inventory Optimization: Align stock by mileage, age, and region-specific best sellers. Premium dealerships should focus on low-mileage newer cars to boost price and profitability. Budget dealerships should stock high-mileage older vehicles.

Profitability: Shift away from low-margin dependency through strategic pricing and product mix. Negotiate with suppliers of top makes/models to improve margins. Replicate successful peak-period sales strategies from early 2015.
