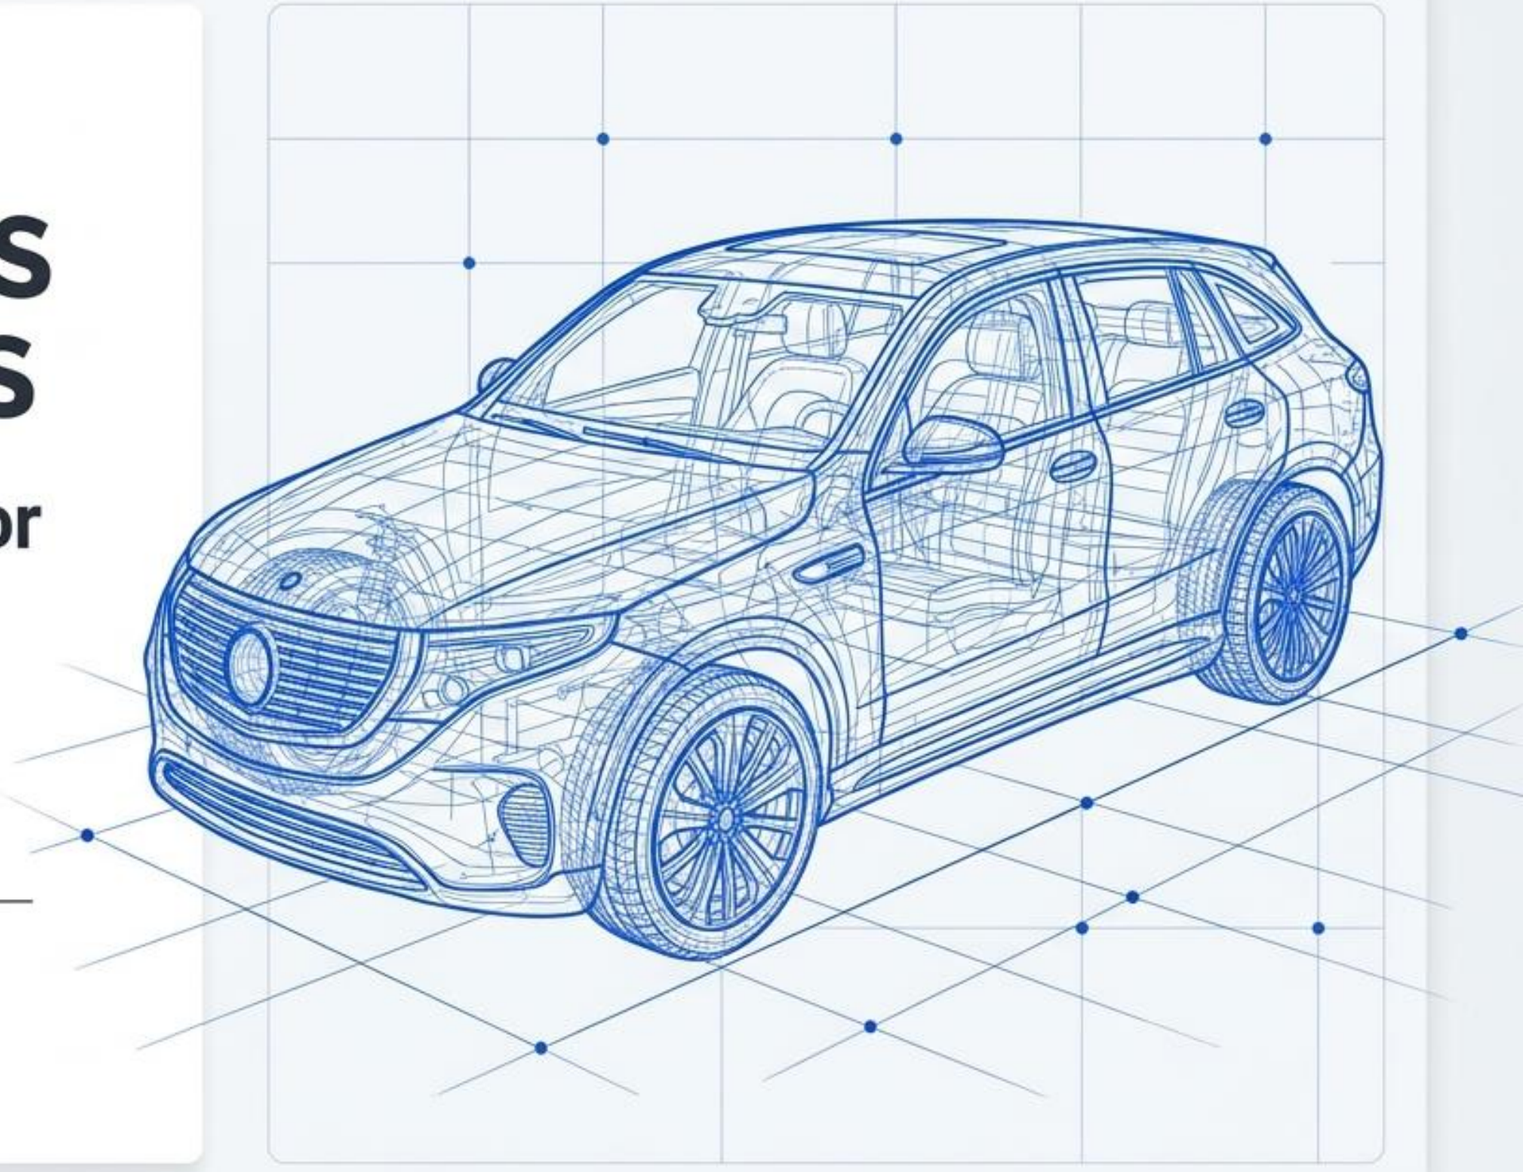
BRIGHT MOTORS SALES ANALYSIS

Data-Driven Strategies for Dealership Expansion and Optimization

By Ndivhuwo Netshiendeulu



NotebookLM

THE EXECUTIVE MANDATE

The Subject: Bright Motors' historical car sales performance across multiple states, makes, and models.

The Objective: Provide the new Head of Sales with actionable insights extracted from 2012–2015 historical data.

1. EXPAND THE DEALERSHIP NETWORK

2. IMPROVE SALES PERFORMANCE

3. OPTIMIZE INVENTORY

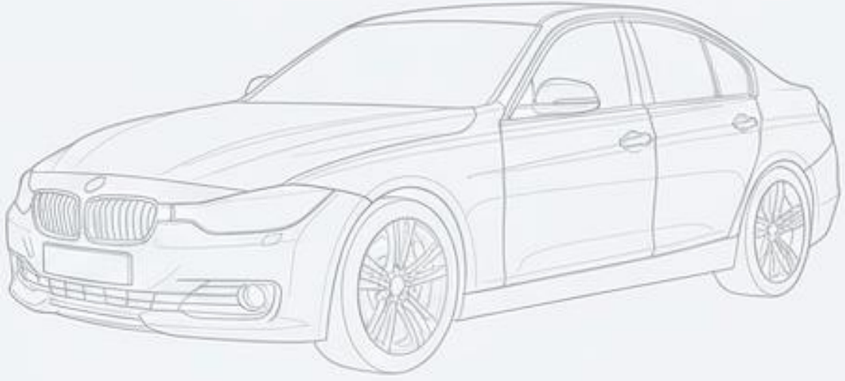
THE PHYSICS OF INVENTORY: MILEAGE VS. PRICE CORRELATION

THE BUDGET / VINTAGE ERA (1982–1991)

- ↑ HIGH AVERAGE MILEAGE: 52.1K TO 162.8K
- ↓ LOW SELLING PRICE: R943 TO R12.8K

THE PREMIUM / MODERN ERA (2006-2015)



- ↓ LOW AVERAGE MILEAGE
- ↑ HIGH SELLING PRICE: R8.0K TO R50.9K

KEY INSIGHT:

Across both old and new inventories, a strict inverse correlation dictates value—low mileage guarantees high pricing power; high mileage sharply depresses average selling price.

GEOGRAPHICAL PERFORMANCE DISPARITY

TOP TIER MARKETS (THE DRIVERS)

Florida (fl):	R1.2B
California (ca):	R1.1B
Pennsylvania (pa):	R861.2M
Texas (tx):	R606.5M

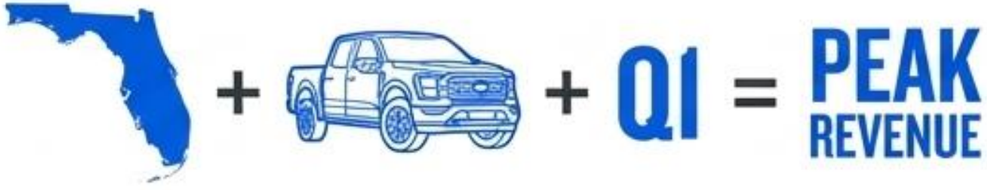
BOTTOM TIER MARKETS (THE DRAG)

Alabama (al):	R237.7K
Oklahoma (ok):	R498.1K
Nova Scotia (ns):	R623.0K
New Mexico (nm):	R1.1M

NotebookLM

THE WINNING FORMULA VS. THE MARGIN TRAP

THE WINNING FORMULA



Florida (fl) + Ford F-150 / Nissan Altima + Quarter I = Peak Revenue.

California (ca) thrives on a distinct premium mix: BMW, Infiniti, Nissan, and Mercedes-Benz.

THE MARGIN TRAP

Despite R7.61B in revenue, profitability is highly vulnerable.

MARGIN FUNNEL

STRATEGIC PILLARS I & II: EXPANSION & SALES CADENCE

1. NETWORK EXPANSION & REALIGNMENT

- ☐ Expand using proven state-make/model combos (e.g., F-150 in TX/FL, Premium models in CA).
- ☐ Ensure consistent stock availability for historical top-sellers.
- ☐ Reassess underperforming states (al, ok, ns, nm) for relocation, downsizing, or pivoting to a digital-only presence.

2. SALES PERFORMANCE & SEASONALITY

- ☐ Maximize early-year demand by expanding dealership presence in Q1.
- ☐ Fix weak Q3 & Q4 metrics by introducing low-season promotions (discounts, financing deals, trade-in incentives) to smooth yearly revenue distribution.

NotebookLM

STRATEGIC PILLARS III & IV: INVENTORY & PROFITABILITY

3. SEGMENTED INVENTORY OPTIMIZATION

- Align stock directly with regional best-sellers, mileage, and age data.
- Premium Dealerships: Source low-mileage, newer cars to lift average selling prices.
- Budget Dealerships: Source older, high-mileage cars to dominate volume.

4. PROFITABILITY & THE MARGIN PIVOT

- Transition away from the 83.5% low-margin dependency by reshaping the product mix toward medium/high-margin sales.
- Negotiate strategic supplier partnerships with top makes (Ford, Chevy) to improve margins.
- Replicate the specific promotional campaigns and dealer incentives that drove the early 2015 revenue spikes.
